I. AMENDMENT

Amendment of the Claims:

The following listing of the claims replaces all previous listings or version of the claims:

Listing of the Claims

- 1. (Currently Amended) A method of inhibiting proliferation of multiple myeloma cells <u>in vitro</u> or <u>in vivo</u>, comprising the steps of: contacting said cells with eureumin, wherein said eureumin inhibits an amount of a curcuminoid effective to inhibit the proliferation of multiple myeloma cells.
- 2. (Currently Amended) A method of inducing apoptosis in multiple myeloma cells <u>in vitro or in vivo</u>, comprising the steps of: contacting said cells with curcumin, wherein said curcumin inhibits induces an amount of a curcuminoid effective to induce apoptosis in multiple myeloma cells.
- 3. (Withdrawn) A method of increasing the cytotoxic effects of <u>one or more</u> chemotherapeutic agent against multiple myeloma cells, comprising the steps of: contacting said cells with said <u>one or more</u> chemotherapeutic agent and <u>curcumin_a curcuminoid</u>, wherein said <u>curcumin_a curcuminoid</u> increases the cytotoxic effects of said <u>one or more</u> chemotherapeutic agent against multiple myeloma cells.
- 4. (Withdrawn) The method of claim 3, wherein said one or more chemotherapeutic agent is

selected from the group consisting of vincristine, BCNU, melphalan, cyclophosphamide, Adriamycin, prednisone, velcade, thalidomide, and dexamethasone.

- 5. (Withdrawn) The method of claim 3, wherein said multiple myeloma cells are CD138.sup.+ plasma cells.
- 6. (Currently Amended) A method of treating multiple myeloma in an individual, comprising the step of administering eureumin a therapeutically effective amount of a curcuminoid to said individual.
- 7. (Currently Amended) The method of claim 6, wherein said <u>eureumin_curcuminoid_is</u> administered orally.
- 8. (Currently Amended) The method of claim 6, wherein said <u>eureumin curcuminoid</u> is administered in a dose of from about 0.01 mg/kg of the individual's body weight to about 500 mg/kg of the individual's body weight.
- 9. (Withdrawn) A method of increasing the cytotoxic effects of <u>one or more</u> chemotherapeutic agent against multiple myeloma cells in an individual, comprising the steps of: administering to said individual said <u>one or more</u> chemotherapeutic agent and <u>eureumin a curcuminoid</u>, wherein said <u>eureumin curcuminoid</u> increases the cytotoxic effects of said <u>one or more</u> chemotherapeutic agent against multiple myeloma cells in said individual.

- 10. (Withdrawn) The method of claim 9, wherein said <u>one or more</u> chemotherapeutic agent is selected from the group consisting of vincristine, BCNU, melphalan, cyclophosphamide, adriamycin, prednisone, <u>velcade</u>, <u>thalidomide</u> and dexamethasone.
- 11. (Withdrawn) The method of claim 9, wherein said <u>eureumin_curcuminoid_is</u> administered orally.
- 12. (Withdrawn) The method of claim 9, wherein said <u>eureumin_curcuminoid</u> is administered in a dose of from about 0.01 mg/kg of the individual's body weight to about 500 mg/kg of the individual's body weight.
- 13. (Withdrawn) The method of claim 9, wherein said multiple myeloma cells are CD138.sup.+ plasma cells.
